Notes: 1. Annualized data for 2014 from the Labor Force Survey is the average of estimates for April, July and October survey rounds. The estimates for these rounds exclude data for Leyte province only while that of January exclude Region VIII.

2. Annualized data for 2015 from the Labor Force Survey is the average of estimates for January, April, July and October survey rounds. The estimates for these rounds exclude data for Leyte Province only. The use of the survey rounds that exclude Leyte was based on the results of the referendum conducted among members of the Inter-Agency Committee on Labor and Productivity Statistics.

NA Not Available.

<sup>1</sup> MDG indicator on employment.

<sup>2</sup> Data from 2009 based on 2008 SNA. Thus, data not strictly comparable with earlier years.

<sup>3</sup> Data from 2006 based on refinements in the old methodology for poverty estimation to ensure comparability of estimates across space and over time. Thus, data not strictly comparable with earlier years.

<sup>4</sup> Total family income distribution disaggregated by per capita income decile.

<sup>5</sup> Labor Force Survey began collecting data on school attendance for ages 5-24 years in April 2005 survey round.

<sup>6</sup> The HIV/AIDS and Art Registry of the Philippines is the official record of the total number of laboratory-confirmed HIV positive individuals, AID cases and deaths, and HIV positive blood units in the Philippines. The Registry is a passive surveillance system. Except for HIV confirmation by the National Reference Laboratories all other data submitted to the Registry (example, place of residence) are secondary and can not be verified. The statistics for this indicator exclude cases of Filipinos working overseas because they are not part of the LFS data on working age population.

<sup>a</sup> For comparability of 1997 growth rate with that of 1996, the labor productivity for these two years both used employment data based on 1980 Census-based population projections.

<sup>b</sup> For comparability of 2006 growth rate with that of 2005, the labor productivity for these two years both used employment data based on 1995 Census-based population projections.

<sup>c</sup> Labor productivity data for 2014 were computed using employment data which excluded that of Leyte. For comparability, 2014 growth rates were computed using 2013 labor productivity whose employment data also excluded that of Leyte.

<sup>d</sup> Labor productivity data for 2015 were computed using average employment data of the four survey rounds. For comparability, 2015 growth rates were computed using average employment data from April, July and October survey rounds which also excluded that of Leyte.

<sup>e</sup> Labor productivity data for 2016 were computed using the average of the four survey rounds employment data with the January 2016 data based on the 2010 Census-based population projection. For comparability, the 2016 growth rates were computed using the average of July and October employment data for 2015 and 2016.

<sup>f</sup> For comparability of 1997 growth rate with that of 1996, the employment data for these two years were based on 1980 Census-based population projections.

<sup>g</sup> For comparability of 2006 growth rate with that of 2005, the employment data for these two years were based on 1995 Census-based population projections.

<sup>h</sup> For comparability of 2014 growth rate with that of 2013, the employment data for these two years were based on the averages of April, July and October employment estimates.

<sup>i</sup> For comparability of 2015 growth rate with that of 2014, the employment data for these two years were based on the averages of April, July and October employment estimates.

<sup>j</sup> 1994 data.

\* Less than half the unit used.

Notes: 1. Annualized data for 2014 from the Labor Force Survey is the average of estimates for April, July and October survey rounds. The estimates for these rounds exclude data for Leyte province only while that of January exclude Region VIII.

2. Annualized data for 2015 from the Labor Force Survey is the average of estimates for January, April, July and October survey rounds. The estimates for these rounds exclude data for Leyte Province only. The use of the survey rounds that exclude Leyte was based on the results of the referendum conducted among members of the Inter-Agency Committee on Labor and Productivity Statistics.

3. See Metadata of Statistical Indicators on Decent Work for definitions and other information.

NA Not Available.

1 For comparability of 1997 growth rate with that of 1996, the employment data for these two years were based on 1980 Census-based population projections.

2 For comparability of 2006 growth rate with that of 2005, the employment data for these two years were based on 1995 Census-based population projections.

3 For comparability of 2014 growth rate with that of 2013, the employment data for these two years were based on the averages of April, July and October employment estimates.

4 For comparability of 2015 growth rate with that of 2014, the employment data for these two years were based on the averages of April, July and October employment estimates.

Notes: 1. Annualized data for 2014 from the Labor Force Survey is the average of estimates for April, July and October survey rounds. The estimates for these rounds exclude data for Leyte province only while that of January exclude Region VIII.

2. Annualized data for 2015 from the Labor Force Survey is the average of estimates for January, April, July and October survey rounds. The estimates for these rounds exclude data for Leyte Province only. The use of the survey rounds that exclude Leyte was based on the results of the referendum conducted among members of the Inter-Agency Committee on Labor and Productivity Statistics.

Notes: 1. Details may not add up to totals due to rounding.

2. Annualized data for 2014 from the Labor Force Survey is the average of estimates for April, July and October survey rounds. The estimates for these rounds exclude data for Leyte province only while that of January exclude Region VIII.

3. Annualized data for 2015 from the Labor Force Survey is the average of estimates for January, April, July and October survey rounds. The estimates for these rounds exclude data for Leyte Province only. The use of the survey rounds that exclude Leyte was based on the results of the referendum conducted among members of the Inter-Agency Committee on Labor and Productivity Statistics.

4. See Metadata of Statistical Indicators on Decent Work for definitions and other information.

<sup>1</sup> The statistics for this indicator exclude cases of Filipinos working overseas because they are not part of the LFS data on working age population.

<sup>a</sup> Includes persons with age not reported.

\* Less than half the unit used.
